WINNERS

$$\mu = \exp\left(\mu_{\text{LN}} + \frac{\sigma_{\text{LN}}^2}{2}\right)$$

$$0 \leq \frac{0^2}{1} \leq \frac{1^2}{2} \leq \frac{2^2}{3} \leq \dots$$

FOR THE WIN

A 20x20 pixelated grayscale image of the letter 'E'. The letter is rendered in a dark gray/black color against a light gray background. The style is low-resolution and pixelated, with some noise or graininess visible in the background and the edges of the letter.

A 16x16 grayscale pixelated image of the number 7. The image is composed of a grid of pixels with varying intensities of gray, ranging from white to black. The number 7 is formed by a thick vertical stroke on the right side and a horizontal stroke at the top. The pixels are arranged in a way that creates a blocky, digital appearance. The background is white, and the number itself is primarily black and dark gray.

A 16x16 grayscale pixelated image of the number 77. The image is composed of 256 individual pixels, each represented by a small square. The color of each pixel is determined by its value in a 16x16 grid of numbers from 0 to 255. The number 77 is formed by a pattern of dark gray and black pixels against a white background. The first '7' is on the left, and the second '7' is on the right. The image is a simple, low-resolution representation of the number 77.

$$S(t) = \sum_{n=0}^{N-1} x[n]$$

$$H = \begin{pmatrix} -a & -0 & -1 & 0 & 0 & 0 & ar & 0 & r \\ 0 & 0 & 0 & -a & -0 & -1 & 0 & 0 & 0 \\ -c & -b^2/a & -1 & 0 & 0 & 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & -c & -b^2/a & -1 & cr & rb^2/a & r \\ a & 0 & -1 & 0 & 0 & 0 & ar & 0 & -r \\ 0 & 0 & 0 & a & 0 & -1 & 0 & 0 & 0 \\ -c & b^2/a & -1 & 0 & 0 & 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & -c & b^2/a & -1 & -rc & rb^2/ar & -r \end{pmatrix}$$

$$\lim_{x \rightarrow \infty} - \frac{\log \mathbb{P}(X \geq x)}{x},$$

$$= \lim_{x \rightarrow \infty} - \frac{\log \mathbb{P}(X > x)}{x} = \lim_{x \rightarrow \infty} - \frac{\log(e^{-x/\theta})}{x}$$
